

Open/Close Switches Surface

Controllers/Switches

The switches come fully assembled complete with barrel, volt-free contacts and engraved plate. The switches are designed to be used with either a key or a paddle switch fitting.

Designed mainly for smoke ventilation applications. Instructional text is etched into the plates surface for improved durability.

An open/close switch is also available as a rocker version.

This range of completed switches feature:

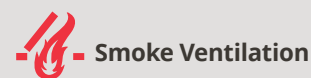

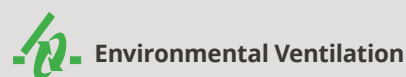

- 3 positions
- Spring return
- Fixed position versions are available
