

# SHEVTEC® Aluminium Upstand Louvre

*Providing smoke ventilation*

**SHEVTEC®**  
Aluminium Upstand Louvre

SHEVTEC® Aluminium Upstand Louvre

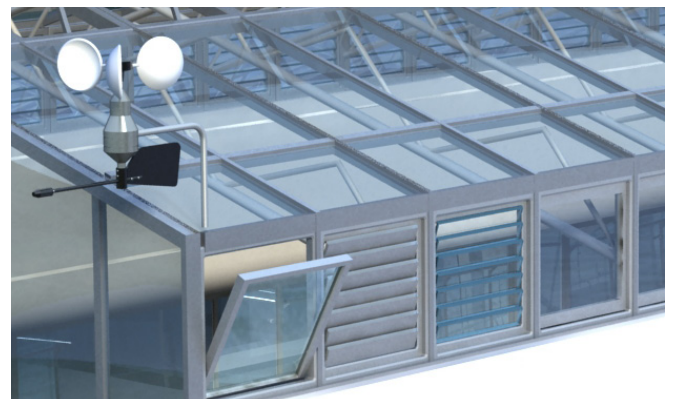

## Applications

### Features:

SE Controls SHEVTEC® Aluminium Upstand Louvres are used in the atria of a building to provide smoke ventilation in the event of a fire, by opening automatic opening vents in the upstand of the atria to control the smoke reservoir within the atria.

SE Controls SHEVTEC® Aluminium Upstand Louvres are certified and tested in accordance with EN12101-2 for use in natural smoke and heat exhaust ventilation systems (SHEVs).

## **CE CERTIFIED**

*Compliant to applicable regulations.*
